

4800 Spring Park Road, Jacksonville, Florida

JAX2 is a 125K SQFT facility located at 4800 Spring Park Road in Jacksonville. Cologix owns and operates this network-neutral, hurricane-rated building, housing the leading enterprise-grade and disaster recovery data center. This facility is unsurpassed in space, power and network services, with redundancy as the key feature. Power, network and security systems are all redundant with automatic backup systems to ensure maximum uptime.

Top Connectivity in Jacksonville

Cologix is your network-neutral partner, providing customers with direct, fast interconnection to approximately 10 unique networks in the company's on-site Meet-Me-Room (MMR) and direct access to the JXIX Internet Exchange. In addition, the site offers dark fiber connectivity to JAX1 with access to 40+ unique networks and fiber routes to Caribbean and Central and South American carriers as well as an extended reach for direct access to Cologix customers.

Why Cologix Jacksonville?

Cologix Jacksonville offers robust connectivity from the city's central business district to Northeast Florida's largest concentration of internet and telecommunications companies, with access to submarine cables and direct fiber to Central and South America. The facility offers customers an express route to South America without traversing through Miami, reducing costs, latency and risk. Customers find the data center infrastructure, reliability, connectivity and redundancies to be best-in-class and appreciate the ease of doing business with Cologix.

Site Specifications **JAX2: 4800 Spring Park Road, Jacksonville, Florida**

Site Information

- Site capacity — 7.5 MW
- Site type — Cologix Owned
- DC Space — 125K SQFT
- Building — Renovated in 2009 and 2015; 2-story, steel frame and brick; Category 5 hurricane rated; seismic 0; outside of the 100 and 500-year floodplains
- Campus — 5 acres
- Data Halls — 6
- Rack Size Up To — 45 RU
- Space Configuration — Hot/cold aisle containment, cabinets, cages and private suites

Security

- Cameras — Closed-circuit television (CCTV) system
- Access — Badge and biometric checkpoints on all entrances and mission-critical areas
- Security Personnel — 24/7/365

Environmental Controls

- Cooling — DX Liebert Air Systems
- Fire Suppression — Pre-action systems, multi-stage, zoned and localized dry pipe
- Fuel storage — 25K gallons

Power

- Generator + UPS — 9 Mitsubishi Summit Series generators with Li Battery UPS Systems
- Load Design — 200W/SQFT, high density available
- Power Usage Effectiveness (PUE) — 1.6

Connectivity

- Meet-Me-Room (MMR) — 1, Cologix controlled
- Networks — 40+ unique network providers
- Fiber Entrance — Diverse building fiber entrances and riser facilities
- Point of Entry (POE) — 4
